

Schenck Farms Spring Plants

2025

Available exclusively from JVK, Schenck Farms Spring Products provide a wide range of new and proven varieties. Explore the possibilities of proven varieties such as Solenia Begonias, Sunpatiens, Paradise NGI, as well as a range of new and exciting Calibrachoa Series.

Schenck Farms and Greenhouses Co. has consistently remained a key contributor to the floral industry since Louis Schenck established it in 1891. Louis began growing and packaging fruits and vegetables earning the status from his unique labeling: “... **equaled by few and surpassed by none**”. In the late 1920’s, the farm gradually shifted away from vegetable production to developing exceptional floral products.

This reputation has carried over through five generations to what Schenck Farms is today. The first greenhouses were erected in 1920, replacing several hothouses. Today, the site is populated with an impressive cluster of greenhouses which grows, begonias, kalanchoes, geranium cuttings and a variety of floral products. Schenck Farms & Greenhouses remains a family business, passed down from a generation of pride and experience.
